Syllabus – June 3, 2015, IDAS English Corner, Course Time, Tuesday and Friday, 2pm-5pm

Micro Economics of Competitiveness – Firms, Clusters, and Economic Development

Instructor – Janet Tan

Course Expectations

Background:

This course focuses on learning through the active application of new concepts in class discussions and team projects. This allows students to test their understanding of theoretical tools by applying them to real-life situations. The success of this method depends strongly on the active participation of all students in the preparation of cases, in class discussions, and in their team projects.

The class is teaching with the HBS case method. All students are expected to make their best effort to participate actively in the case discussions, and encourage and support the participation of others.

Attendance and Preparation:

Given the cumulative nature of the course and the relatively small number of class sessions, attendance at every class is mandatory and important. Students must notify the instructor of any absence in advance of class by e-mail (janettan.liu@gmail.com). In the case of an emergency, contact us as soon as possible afterward. Even for absences due to illness, students are responsible for assignment preparation and for discussing the class with colleagues.

Classroom Discussions:

Primarily, *MOC* is a course about a way of thinking about competitiveness. The "answer" is less important than the thinking process. Analytical rigor is highly valued.

Class discussions will consist of a combination of volunteers and students called on by instructors. Students may be called on to start the class or at any time during class. In their participation, students will be expected to assimilate and build on the class contributions of other students. Students who volunteer to contribute by raising their hand should be prepared to do so in a concise and logical manner, marshaling evidence to support their views. The capacity to integrate across facts, issues, and cases is valued. All discussions should be constructive in approach and tone. No outside-of-case data should be used. Students should be prepared for follow-up questions from the instructor and/or other students.

<u>Team Project</u>

Guidelines for the team cluster competitiveness project are described in a separate memo.

Grading

Students will be graded on the following basis:

- <u>Class participation in all sessions, including the team presentation sessions.</u> 50%
- <u>Team Project</u>. All aspects of the project will be evaluated, not just the final report. 50% The same grade will be awarded to each member of the team except in unusual circumstances.

100%

Course Outline

Contents may change depending on students' pace and project progress.

Module	Date	Session	Case Study	Readings
Part I:	Day	Introduction and		On Competition
Firms,	1	class rules		Chapter 2
